Executive summary

May revenue came in at DKK 19.2M, 9% ahead of budget and up 12% year-on-year, driven by stronger-than-expected hardware sell-through in the Ltd entity and continued SaaS attach on recent studio openings. EBITDA of €1,332K beat budget by €453K, lifting the margin to 6.95% from a budgeted 5.02%, as gross margin held steady at 56.1% despite higher direct costs tied to the CPH studio ramp-up.

Year-to-date, EBITDA of €5,748K is running €2,586K ahead of plan, supported by disciplined OPEX growth relative to revenue. Cash ended the month at €47.6M, €25.6M above budget, largely reflecting the new long-term financing drawn in Q2. Net profit YTD of €21.8M is materially boosted by one-off financial items; underlying trading profitability remains healthy and broadly on track with the full-year forecast.

Revenue / Actuals	May 2026	EBITDA / Actuals	May 2026	EBITDA / Actuals	YTD 2026	Cash end period / Actuals	May 2026

Revenue outperformance this month was broad-based across channels, with the 12% YoY uplift driven primarily by hardware sales and a growing SaaS base. Direct costs rose slightly faster than revenue (113 index vs. LY), compressing gross margin marginally to 56.1%, largely due to component cost inflation on new bike shipments. Operating costs were 4% over budget, mainly salaries (+€225K) tied to the CPH studio hiring plan, but EBITDA still beat budget by €453K. The large YTD swing in financial & non-recurring items (€21.3M) reflects a one-off gain from the recent refinancing and is not expected to recur at this scale for the remainder of the year.

Total assets grew to €178.6M, 34% above budget, driven by higher-than-planned trade receivables (€64.4M, +€9.5M) as revenue growth outpaced collections timing, and a cash balance well ahead of plan. On the liability side, long-term liabilities of €60.9M are €25.8M over budget following the new debt facility drawn to fund studio expansion and working capital. Equity of €29.4M sits 13% below budget, mainly reflecting the €27.2M dividend distribution made earlier in the year, which has not yet been offset by retained YTD earnings.

Operating cash flow YTD of €34.8M is €33.5M ahead of budget, driven by strong P&L performance and a positive working capital swing of €10.5M as deferred revenue built up faster than receivables grew. Financing activity reflects €25.8M of new borrowing drawn during the period to fund the CPH studio build-out and support growth capex. Investing outflows of €6.4M relate primarily to equipment purchases for new studio locations. As a result, cash ended the month at €47.6M, more than double the budgeted level and 62% above the prior year.

Net working capital breakdown

Net working capital of €29.3M is running 105% above budget, driven by trade receivables growth (€64.4M) that has outpaced the corresponding increase in payables (-€53.6M) and deferred revenue (-€17.7M). This build reflects the timing lag between studio membership invoicing and collections, particularly around the CPH launch cohort. While the cash position benefits in the short term from deferred revenue inflows, management is monitoring receivables days closely to ensure collection cycles normalize as the studio base matures.

Status: CPH studio

Fit-out complete, opening on track for Q3

The CPH studio fit-out is substantially complete, with the main training floor, reception, and changing facilities now operational. Remaining works are limited to signage and final equipment calibration. The site remains on track for its planned Q3 opening, with no material schedule slippage identified since the last review. Staffing for the studio is progressing in parallel, with instructor recruitment now 80% complete against the opening headcount target.

Equipment capex running 22% above budget

Operating asset spend of DKK 36.3M is 22% above the DKK 29.75M budget, driven by an upgraded bike and equipment specification agreed after the initial capex plan was set. Furniture and IT spend remain exactly on budget at DKK 1.58M and DKK 2.02M respectively. The overspend on operating assets is expected to be a one-off related to the equipment upgrade decision and is not expected to recur across future studio openings.

Membership pre-sales ahead of plan

Pre-sale membership sign-ups for the CPH studio are tracking ahead of the launch plan, supporting management's expectation of a faster ramp to breakeven occupancy than seen in prior studio openings.

Appendix I - Monthly review

Revenue performance per channel

Revenue performance per entity

Appendix II - YTD review

P&L breakdown

The YTD bridge from revenue to EBITDA shows direct costs and salaries as the two largest cost drivers, together accounting for roughly 76% of revenue. Salaries of €29.4M reflect continued headcount growth to support both existing studios and the CPH build-out, while direct costs of €41.8M scale largely in line with hardware and SaaS delivery volumes. Sales & marketing spend of €8.4M is modestly elevated versus a typical run-rate as the business invests in the CPH launch campaign. The resulting €5.75M EBITDA represents a 6.1% margin, ahead of the YTD budgeted margin of 3.7%.

Cash flow performance

The YTD cash bridge shows the €20.7M opening cash position building to €47.6M by period end, driven primarily by €24.2M of underlying P&L cash generation and a €10.5M positive working capital contribution from deferred revenue. Investing outflows of €6.4M relate to studio equipment and IT infrastructure spend, including the CPH build-out. The overall cash build of €27.0M YTD is well ahead of the €1.3M budgeted, reflecting both stronger trading performance and the timing of financing inflows drawn earlier than originally planned.

Appendix III - Misc.

Working capital - LTM trends

Cash and trade receivables have both trended upward in line with revenue growth, while payables and deferred revenue have grown more gradually, reflecting the studio membership billing cycle. VAT balances have moved in step with revenue seasonality.
